## Airc, le nomine

# Ad Azzone la presidenza dell'Ifom

**D**a oggi Fondazione Airc per la ricerca sul cancro affida a Giovanni Azzone la presidenza e ad Alberto Bardelli la direzione scientifica di Ifom, l'Istituto di oncologia molecolare fondato a Milano nel 1998 con l'obiettivo di studiare la formazione e lo sviluppo dei tumori a livello molecolare. L'istituto conta circa 270 ricercatrici e ricercatori da 29 Paesi europei ed extraeuropei, età media 38 anni. «Ifom è fondamentale per perseguire l'obiettivo di rendere il cancro sempre più curabile, attraverso la ricerca», ha detto Andrea Sironi, presidente di Fondazione Airc.
