

## **A\*STAR collaborates with Italian institutes**

A\*STAR has signed a Memorandum of Intent (MOI) with three Italian partner-institutes: the FIRC Institute of Molecular Oncology (FIRC), the European Institute of Oncology (IEO) and the European School of Molecular Medicine (SEMM). These three institutes are part of the IFOM-IEO Campus – one of the largest European centres for cancer research. The MOI will foster research collaborations, manpower and student exchanges, and the sharing of scientific services between A\*STAR and the IFOM-IEO Campus, targeted at developing basic scientific findings into new strategies of cancer treatment and prevention.

In addition, A\*STAR also inked an agreement with the University of Milano-Bicocca to mark the implementation of the A\*STAR-University of Milano-Bicocca Research Attachment Programme, which provides University of Milano-Bicocca PhD students with opportunities to receive part of their research training at A\*STAR research institutes.
